

UNFPA NEPAL HUMANITARIAN RESPONSE IN THE COVID-19 PANDEMIC **SEXUAL AND REPRODUCTIVE HEALTH**

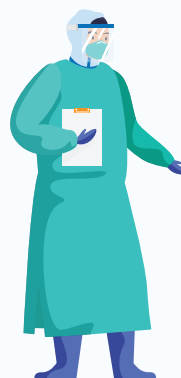

Co-led Reproductive Health Sub-cluster at the **federal level and three provinces**, ensuring a robust and well-functioning coordination mechanism.

4 rounds of assessments of public health facilities were conducted to inform government and other partners about **planning sexual and reproductive health response**.

Supported in developing the **Interim Guidelines** for Reproductive, Maternal, New Born, Child and Adolescent Health and oriented **3,454** health programme managers and service providers on it.

Procured **7,248** PPE sets and **275** Inter Agency Reproductive Health Kits, 3,600 units of hand sanitizer, 500,000 pairs of examination gloves and 50,000 masks.

33,303 pregnant women were helped, with essential and timely emergency obstetric and neonatal care through teleconsultations through 520 health facilities.

102 pregnant women provided with free ambulance services in 16 districts.

670 women in remote areas given family planning counseling and services through visiting service providers.

8.8 million people, including pregnant and new mothers, reached through sexual and reproductive health messaging.

6,506 callers reached with sexual and reproductive health information and counseling services through toll-free helplines.

Figures cover the period until 2020
